- Jonny Noble**, AIA, LEED AP BD+C, Senior Associate;
- Shifa Virani**, Associate;
- Pim Sunsaneevithayakul**, Architectural Intern;
- Kent Turner**, AIA, SDFC, Advisor

THE CONCEPT:

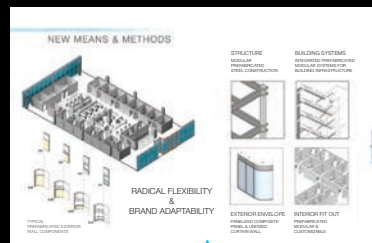

iIMPACTsolutions will be a next-generation pre-designed, pre-engineered, scalable, radically flexible, sustainable, guaranteed, SYSTEMS BASED BUILDING SOLUTION specifically tailored to the expanding continuum of ambulatory care for a below-market cost and complete on-site delivery in half the time of conventional alternatives. This elegant solution is brand adaptable and allows a client to buy a new building like a product, not dissimilar from buying a car. Integrating multiple procurement partners and utilizing innovative offsite, prefab, modular design and construction methodologies, this building solution will arrive on site and be MORE ASSEMBLED THAN CONSTRUCTED.

A technology-driven platform for patient care utilizing a new paradigm for design, delivery, and asset management.

A new basis for programming, planning, and design utilizing a universal module, planning grid, and kit of parts.

A new means and methods in fabrication and delivery.

A new process for enhanced client experience and an optimized process for procurement.
