DESIGN TEAM:

Grant Geiger, CEO & Founder;
Patrick Fenningham, Chief Product
Officer; **Mauri Lawler**, Chief Clinical
Officer

THE CONCEPT:

MedModular is the world's first application of prefabrication and modular technology of hospital rooms to ensure faster delivery and build times, and minimized budgets. The rooms are delivered 90% complete, wired with smart technology, for easy "Lego-esque" integration into hospital infrastructure. This way, attention, and resources can be directed where they matter most – with the patients and those who care for them.
