SHOWCASE

**2024 CALL FOR
SUBMISSIONS**

ANNOUNCING THE 24TH ANNUAL HEALTHCARE DESIGN SHOWCASE

The Healthcare Design Showcase is a compilation of recent healthcare projects from firms across the globe. Both built and unbuilt projects, demonstrating thoughtful solutions to support the delivery of care, are featured in this must-read, must-keep resource.

An elite jury of architects, interior designers, providers, and consultants will evaluate projects. Their rigorous review process is based on four judging criteria:

- Innovation
- Aesthetics
- Experience
- Operational Performance

Projects that excel in these areas will receive special recognition.

Benefits of Participation

- All projects that meet scoring requirements will be published in the August 2024 print and digital issue, providing maximum exposure for firms and their projects.
- All participating firms will receive 25 copies of the August 2024 issue and options for additional promotional opportunities.
- An awards luncheon will be held during the Healthcare Design Conference + Expo, the industry's ultimate networking, education, and product-sourcing event (Oct. 2024, Indianapolis). Award of Merit and Honorable Mention award winners will take center stage during this prestigious awards program, plus receive expanded editorial coverage in the August 2024 issue.
- Finalists (projects deemed highly noteworthy by the jury) will be recognized in the magazine and during the awards program.

2023 Award of Merit Winner: The University of California, San Francisco, Nancy Friend Pritzker Psychiatry Building. Submitted by: ZGF (Portland, Ore.). Photo: Bruce Damonte

Submission Guidelines

Projects may be submitted by project team members, such as architecture, interior design, engineering, and construction firms, as well as the associated healthcare organizations and facilities.

Construction Categories

- New Construction
- Remodel/Renovation (modifications to an existing facility)
- New Construction and Remodel/Renovation (additions and modifications to an existing facility)
- Addition (new construction added to an existing facility with little or no change to original facility)
- Conversion (adaptation of an existing structure into a new facility)
- Project-in-Progress
- Unbuilt/Conceptual Design

All projects must have been completed between January 2021 and March 2024, except Project-in-Progress or Unbuilt/Conceptual Design submissions. Previously published projects may not be resubmitted under the same construction category.

Presentation and Publication Materials

Upon receipt of your reservation, you will receive a submission guide and template for preparing your electronic presentation.

Presentation for Jury Review

Beautiful photographs are encouraged, but the best submissions will highlight how projects responded to the unique needs of the healthcare organization and patient population being served. For example, submissions should include details on challenges faced and solutions identified such as program requirements and operational approaches that were accommodated or unusual site conditions or environmental goals that influenced design decisions. Include how project team members collaborated with one another as well as the community to resolve the design and identify ways that the project supports the experience of patients, staff, and visitors. From innovations introduced to creative problem-solving, these key elements of the project will tell the jury the whole story.

Presentations due March 29, 2024

Materials for Publication

Participants will receive results following the jury review and award selection.

The following forms/materials must be provided by May 17, 2024:

- Firm and facility contact information
- Project narrative
- List of design team members
- Photo release agreement
- High-res images for publication

Proofs will be issued and must be reviewed and approved by participants by the deadline provided.
